Yogya Chugh

Software Engineer (Mobile, Full-Stack, Backend) | Delhi, India
+91 96500 29959 | build@yogya.dev | yogya.dev | github.com/YogyaChugh | linkedin.com/in/yogyachugh

Education

Panipat Institute of Engineering and Technology — Panipat, India
B.Tech in Computer Science and Engineering (Kurukshetra University); CGPA: 8.05/10 — *2023 – 2027*

Work Experience

Meant2Bae | meant2bae.com — Sep 2026 – Present
Software Engineering Intern — *India (on-site)*

- Building the admin dashboard (React, TypeScript, Supabase) that runs the matchmaking pipeline from signup to dates, with undo on every action and an audit log of status changes.
- Wrote 40+ PostgreSQL migrations: permission-checked admin functions, Row Level Security (RLS), and a delta sync that resends only changed rows.
- Built automated reminder emails (pg_cron, Edge Functions), a Calendly webhook, a Google Sheets matchmaking sync and the site's readiness quiz.

ScreenDemons | screendemons.app — Jun 2026 – Present
Freelance Mobile App Developer — *Remote*

- Building a social screen-time app end to end (React Native, Expo, Supabase); live on the App Store.
- Integrated Apple's Family Controls and DeviceActivity APIs to enforce screen-time limits on the device.

Vardhman Electricals | vardhmansaathi.shop — Mar 2026 – Jun 2026
Software Developer Intern — *Delhi, India (remote)*

- Built Vardhman Saathi end to end, a dealer loyalty and invoice platform: a React Native (Expo) Android app on Google Play, an Electron + React admin app and a Supabase backend.
- Synced the app and 3 admin dashboards in real time for 200+ concurrent users; Google OAuth, JWT auth.
- Cut hosting from $7/month to $0/month by moving to Supabase Edge Functions and Cloudflare (Workers, R2, Pages), with CI/CD on GitHub Actions.

Projects

Burrow (formerly AnyStudio) | *Kotlin, Kotlin Multiplatform, Rust* — 2026 – Present

- Building a compiler, written in Kotlin, that turns a JSON app description into one Kotlin Multiplatform project for Android, iOS and desktop; it tracks 697 platform capabilities.
- Added a web editor, a Model Context Protocol (MCP) server for Claude Code, Codex and Cursor, an AI agent, and importers for Figma, Compose, SwiftUI and GraphQL.
- Began in Rust, with a DEX writer that built Android bytecode without the JDK; rebuilt in Kotlin for iOS.

Webelo | *C++, Python* | github.com/YogyaChugh/Webelo — Jul 2025 – Sep 2025

- Implemented the WHATWG DOM Living Standard in C++; v2.0 adds Python bindings and a visualizer.

Hack Club Summer of Making 2025 | *Python, Pygame* — Jun 2025 – Sep 2025

- Logged 450+ hours and shipped 4 projects, including Webber, a website downloader, and Timberly, a game.
- Earned 6,612 shells and a $1,322 grant, which bought a Gigabyte Aero X16 laptop.

Django (open source) | django/django PR #19295 — Mar 2025

- Reported and fixed ticket #36271: a relative {% extends %} path with no known template origin now raises a clear TemplateSyntaxError; added regression tests.

Technical Skills

Languages: TypeScript, JavaScript, Kotlin, Python, C++, Rust, SQL
Mobile & Frontend: React Native, Expo, Kotlin Multiplatform, React, Electron, Framer, HTML/CSS
Backend: Node.js, Express, Django, FastAPI, Flask, Hono, REST APIs, JWT, OAuth 2.0
Data & Cloud: PostgreSQL, Supabase, Cloudflare (Workers, R2, D1, KV, Pages), Vercel, Firebase/GCP
DevOps & Tools: Git, GitHub Actions (CI/CD), Docker, Gradle, Linux, MCP servers, Claude Code
Core CS: Data Structures and Algorithms, OOP, DBMS, Computer Networks, Compiler Design

Achievements

- 3rd place (team), University of Derby and Ulster University hackathons (2025); built the Pippo robot's app.
- Founder and President, PIET Comp Techies (college tech club); organised Frontend Frenzy web-dev contest.
- 1st place, Pattern Coding Competition 2023; selected in Smart India Hackathon internal rounds (2024, 2025).
