TECHNICAL SKILLS

- Languages:** C++, Rust, Python, TypeScript, JavaScript, SQL
- Core CS:** Data Structures & Algorithms, OOP, DBMS, Computer Networks, Compiler Design
- Backend:** FastAPI, Flask, Django, Node.js, Hono, REST API Design, JWT, OAuth 2.0
- Databases & Cloud:** PostgreSQL, Supabase, Firebase/GCP, Cloudflare R2, D1, Workers, KV, Pages
- Frontend & Apps:** React, React Native, Expo, Electron, HTML/CSS
- Tools & Platforms:** Docker, Git, Linux, CI/CD (GitHub Actions)

WORK EXPERIENCE

Meant2Bae

Software Engineering Intern (paid, on-site) · curated dating service for professionals

India
Sep 2026 – Present

Client Application Project

Software Developer – Freelance

Remote
Jun 2026 – Present

- Building a cross-platform iOS and Android app end to end, headed for the App Store and Google Play. Details are confidential.

Vardhman Electricals

Software Developer – Intern (paid, remote)

Delhi, India
Mar 2026 – Jun 2026

- Built a loyalty and invoice platform end to end: a React Native (Expo) Android app on Google Play ([Vardhman Saathi](#)), an Electron + React admin desktop app, and the backend; live at vardhmansaathi.shop.
- Real-time sync across 3+ admin dashboards for 200+ concurrent users; Google OAuth and JWT authentication.
- Designed the PostgreSQL schema on Supabase for authentication, orders and admin-dashboard data.
- Moved the backend from a \$7/month server to Supabase Edge Functions and Cloudflare (Workers, R2, Pages) with GitHub Actions CI/CD, bringing hosting to \$0/month.

PROJECTS

AnyStudio – Native App Builder

Personal Project

Private Repository
In Development

- Turns a plain-English description or a drag-and-drop design into real native Android and iPhone apps (not web wrappers), with an AI assistant whose changes the user reviews before they apply.
- Live phone preview; built-in sign-in, databases and payments; publishing under the user's own store accounts; full source export with no lock-in. Written in Rust.

Webelo – C++ DOM Library

Personal Project

github.com/YogyaChugh/Webelo
Jul – Sep 2025

- Implemented the WHATWG DOM Living Standard in C++: node tree, preorder DFS traversal and event dispatch.
- Shipped v2.0 with an HTML visualizer, Python bindings and hosted documentation.

Pippo – Multilingual Navigation Robot

College Project

Team Project
2024 – 2025

- Robot guide for tourists and newcomers: voice interaction via the ElevenLabs API, conversational Q&A and autonomous path navigation. Built its companion mobile app.

Open Source – Django

Contributor

[django/django #19295](https://github.com/django/django/pull/19295)
Merged Mar 2025

- Fixed a bug where an unresolved relative {% extends %} template path raised an unrelated `AttributeError` instead of a clear `TemplateSyntaxError`.

EDUCATION

Panipat Institute of Engineering and Technology (Kurukshetra University)

B.Tech – Computer Science and Engineering · CGPA 8.05/10

Panipat, India
2023 – 2027

ACHIEVEMENTS

- Hack Club Summer of Making 2025 (GitHub-funded): 4 projects, 450+ hours; won a Gigabyte Aero X16 laptop.
- 3rd place, Cyber AI Hackathon (Univ. of Derby, UK) and Agentic AI Hackathon (Ulster Univ., UK), 2025, with Pippo.
- Founder & Lead, college Technical Club; organised Frontend Frenzy, a website development competition.
- Selected in SIH internal rounds (2024, 2025): blockchain tourist ID verification (React, ethers.js, WalletConnect).
- 1st place, Pattern Coding Competition 2023 (Rs. 2,000 cash prize).
