EXPERIENCE

Meant2Bae · Intern

NOW

Sep 2026 – Present

Paid internship · curated matchmaking startup for professionals in India

Client app project · Software Developer (Freelance)

NOW

Jun 2026 – Present

Remote

- Building a cross-platform iOS and Android app in React Native (Expo), headed for the App Store and Google Play.
- PostgreSQL on Supabase with Google and Apple sign-in and row-level security policies.
- Subscription payments through Superwall.

Vardhman Electricals · Software Developer Intern

Mar 2026 – Jun 2026

Paid internship · remote · Delhi, India

- Built a loyalty and invoice platform end to end: a React Native (Expo) Android app on [Google Play](#), an Electron + React admin desktop app, and the backend. Live at vardhmansaathi.shop.
- Real-time sync across 3+ admin dashboards serving 200+ concurrent users, with Google OAuth and JWT authentication.
- Designed the PostgreSQL schema on Supabase for authentication, orders and admin-dashboard data.
- Moved the backend from a \$7/month server to Supabase Edge Functions and Cloudflare (Workers, R2, Pages) with GitHub Actions CI/CD, bringing hosting to \$0/month.

PROJECTS

AnyStudio · native app builder

In development

- Turns a plain-English description or a drag-and-drop design into real native Android and iPhone apps, not a website wrapped in an app.
- An AI assistant builds screens, logins or checkouts with you, and you review every change before it applies; live preview on your own phone.
- Built-in sign-in, databases and payments; publish to Google Play and the App Store under your own accounts; export the full source code with no lock-in. Written in Rust.

Webelo · C++ DOM library

Jul – Sep 2025

- Implements the WHATWG DOM Living Standard in C++: the node tree, preorder depth-first traversal and event dispatch.
- Shipped v2.0 with an HTML visualizer, Python bindings and hosted docs. github.com/YogyaChugh/Webelo

Pippo · multilingual navigation robot

2024 – 2025

College team project

- A robot guide for tourists and newcomers: voice Q&A through the ElevenLabs API, several languages and autonomous path navigation.
- Built its companion mobile app in Python (Flet). 3rd place at two UK university hackathons.

Games · Timberly, Hangman, Snake Hustle

- Timberly: a Pygame game with a Flask leaderboard and encrypted scores, released for web, Windows, macOS and Linux. Hangman in C; Snake Hustle in Flet.

OPEN SOURCE

Django · [pull request #19295](#)

Merged Mar 2025

- Fixed a bug where an unresolved relative {% extends %} path raised an unrelated AttributeError instead of a clear TemplateSyntaxError. Reviewed and merged by Django Fellow Sarah Boyce.

SKILLS

Languages

C++, Rust, Python, TypeScript, JavaScript, SQL

Backend

FastAPI, Flask, Django, Node.js, Hono, REST API design, JWT, OAuth 2.0

Databases & cloud

PostgreSQL, Supabase, Firebase/GCP, Cloudflare R2, D1, Workers, KV

Apps & frontend

React, React Native, Expo, Electron, HTML/CSS

Tools

Docker, Git, Linux, CI/CD with GitHub Actions

Core CS

Data structures & algorithms, OOP, DBMS, computer networks, compiler design

EDUCATION

B.Tech, Computer Science and Engineering

2023 – 2027

Panipat Institute of Engineering and Technology (Kurukshetra University) · CGPA 8.05/10

ACHIEVEMENTS

- Hack Club Summer of Making 2025 (funded by GitHub): 4 projects and 450+ hours; won a Gigabyte Aero X16 laptop (RTX 5070, Ryzen AI 7, 32 GB).
- 3rd place, Cyber AI Hackathon 2025 (University of Derby) and Agentic AI Hackathon 2025 (Ulster University), with Pippo.
- Founder and lead of my college's technical club; organised Frontend Frenzy, a website-building contest.
- Selected in the Smart India Hackathon internal rounds (2024, 2025): a blockchain-based tourist ID system with React, ethers.js and WalletConnect.
- 1st place, Pattern Coding Competition 2023 (₹2,000 prize).
