

Yogya Chugh

Software Engineer Delhi, India

build@yogya.dev +91 96500 29959 yogya.dev github.com/YogyaChugh linkedin.com/in/yogyachugh

Technical skills

Languages	C++, Rust, Python, TypeScript, JavaScript, SQL
Core CS	Data Structures & Algorithms, OOP, DBMS, Computer Networks, Compiler Design
Backend	FastAPI, Flask, Django, Node.js, Hono, REST API Design, JWT, OAuth 2.0
Databases & Cloud	PostgreSQL, Supabase, Firebase/GCP, Cloudflare R2, D1, Workers, KV, Pages
Frontend & Apps	React, React Native, Expo, Electron, HTML/CSS
Tools & Platforms	Docker, Git, Linux, CI/CD (GitHub Actions)

Work experience

-  **Meant2Bae · Software Engineering Intern** Now Sep 2026 – Present
Paid, on-site · curated dating service for professionals · India
-  **ScreenDemos · Freelance App Developer** Now Jun 2026 – Present
Remote · screendemons.app
 - Building ScreenDemos end to end: an iOS and Android app that cuts screen time through challenges with friends.
-  **Vardhman Electricals · Software Developer Intern** Mar 2026 – Jun 2026
Paid, remote · Delhi, India
 - Built a loyalty and invoice platform end to end: a React Native (Expo) Android app on Google Play ([Vardhman Saathi](#)), an Electron + React admin desktop app, and the backend; live at [vardhmansaathi.shop](#).
 - Real-time sync across 3+ admin dashboards for 200+ concurrent users; Google OAuth and JWT authentication.
 - Designed the PostgreSQL schema on Supabase for authentication, orders and admin-dashboard data.
 - Moved the backend from a \$7/month server to Supabase Edge Functions and Cloudflare (Workers, R2, Pages) with GitHub Actions CI/CD, bringing hosting to \$0/month.

Projects

- AnyStudio · Native App Builder** In Development
Personal project · private repository
 - Turns a plain-English description or a drag-and-drop design into real native Android and iPhone apps (not web wrappers), with an AI assistant whose changes the user reviews before they apply.
 - Live phone preview; built-in sign-in, databases and payments; publishing under the user's own store accounts; full source export with no lock-in. Written in Rust.
- Webelo · C++ DOM Library** Jul – Sep 2025
Personal project · github.com/YogyaChugh/Webelo
 - Implemented the WHATWG DOM Living Standard in C++: node tree, preorder DFS traversal and event dispatch.
 - Shipped v2.0 with an HTML visualizer, Python bindings and hosted documentation.
- Pippo · Multilingual Navigation Robot** 2024 – 2025
College team project
 - Robot guide for tourists and newcomers: voice interaction via the ElevenLabs API, conversational Q&A and autonomous path navigation. Built its companion mobile app.
- Open Source · Django** Merged Mar 2025
Contributor · [#19295](https://github.com/django/django/pull/19295)
 - Fixed a bug where an unresolved relative {% extends %} template path raised an unrelated AttributeError instead of a clear TemplateSyntaxError.

Education

- Panipat Institute of Engineering and Technology (Kurukshetra University)** 2023 – 2027
B.Tech, Computer Science and Engineering · CGPA 8.05/10 · Panipat, India

Achievements

- Hack Club Summer of Making 2025: 450+ hours; won a Gigabyte Aero X16, \$25 Steam credit, RDR2 and Far Cry 4.
- 3rd place and \$50 at two international hackathons with Pippo: Univ. of Derby and Ulster Univ., UK (2025).
- Founder & Lead, PIET Comp Techies (college tech club); organised Frontend Frenzy, a website-building contest.
- Selected in SIH internal rounds (2024, 2025): blockchain tourist ID verification (React, ethers.js, WalletConnect).
- 1st place, Pattern Coding Competition 2023 (Rs. 2,000 cash prize).

Interests

Competitive Programming · Game Development · Neural Networks
