TECHNICAL SKILLS

- **Languages:** Python, C++, TypeScript, JavaScript, Rust, SQL
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Computer Networks, Compiler Design
- **Backend:** FastAPI, Flask, Django, Node.js, Hono, REST API Design, JWT, OAuth 2.0
- **Databases & Cloud:** PostgreSQL, Supabase, Firebase/GCP, Cloudflare R2, D1, Workers, KV
- **Frontend:** React, React Native, Expo, HTML/CSS
- **Tools & Platforms:** Docker, Git, Linux, CI/CD (GitHub Actions)

WORK EXPERIENCE

- **Vardhman Electricals** Delhi, India
Software Developer – Intern (Remote) Mar 2026 – Jun 2026
 - Built a TypeScript/Hono REST API on Render with Google OAuth and JWT authentication, using Server-Sent Events (SSE) for real-time sync across 3+ admin dashboards serving 200+ concurrent users; live at vardhmansaathi.shop
 - Designed and deployed a PostgreSQL schema on Supabase to back authentication, orders, and admin-dashboard data
 - Developed an Electron + React admin desktop app and a React Native (Expo) Android app, deployed on Google Play Store at [Vardhman Saathi](https://vardhman.saaathi)
 - Optimized image storage with Cloudflare R2, keeping total hosting cost at \$7/month while supporting live production traffic
- **Client Application Project** Remote
Software Developer – Freelance Jun 2026 – Present
 - Developing a cross-platform iOS/Android app (React Native, Expo), targeting Play Store and App Store launch
 - Implementing a PostgreSQL database on Supabase with Google/Apple authentication and row-level security (RLS) policies
 - Integrating subscription-based payment handling using Superwall

PROJECTS

- **Webelo – Browser Rendering Engine** github.com/YogyaChugh/Webelo
Personal Project Jul – Sep 2025
 - Built a C++ browser rendering engine; DOM tree follows the WHATWG spec with preorder depth-first traversal
 - Shipped v2.0 with an HTML Visualizer, Python bindings, and hosted documentation
- **AnyStudio – No-Code Android App Builder** Private Repository
Personal Project In Development
 - Building a no-code Android app builder in Rust with a drag-and-drop UI canvas that exports a signed, installable APK
 - Writing a custom compiler that generates Android bytecode from scratch, bypassing the Java toolchain entirely
 - Handling backend logic via drag-and-drop blocks, with automatic dependency management (SDKs, apksigner, zipalign) and virtual device testing for the exported APK
- **Pippo – Multilingual Navigation Robot** Team Project
College Project 2024 – 2025
 - Designed a multilingual navigation robot for tourists/newcomers, using voice interaction via ElevenLabs API, conversational Q&A, and autonomous path navigation; also built the companion mobile app for the robot
- **Open Source – Django:** Fixed a bug where an unresolved relative `{% extends %}` template path raised an unrelated `AttributeError` instead of a clear `TemplateSyntaxError`; merged as [django/django #19295](https://github.com/django/django/pull/19295)

EDUCATION

- **Panipat Institute of Engineering and Technology (KUK)** Panipat, India
B.Tech – Computer Science and Engineering 2023 – 2027
 - CGPA: 8.05/10

ACHIEVEMENTS

- Completed 4 projects (450+ hrs) for Hack Club Summer of Making, GitHub-sponsored – won a \$1,649 Gigabyte Aero laptop (RTX 5070, Ryzen AI 7, 32 GB, 1 TB SSD)
- 3rd place, Cyber AI Hackathon 2025 (University of Derby, UK) and Agentic AI Hackathon 2025 (Ulster University, UK) – with Pippo
- Founder & Lead, Technical Club – organized Frontend Frenzy, website development competition
- Selected in SIH internal rounds (2024, 2025) – built a blockchain-based tourist ID verification system with my team, using React, ethers.js, and WalletConnect for the Smart Tourism track
- 1st place, Pattern Coding Competition 2023 – Rs. 2,000 cash prize

INTERESTS

Competitive Programming — Game Development — Neural Networks
